

LambdaTest Playground

QA Testing · Selenium + Java · TestNG

Prepared By Salah Aldin

LambdaTest Playground

It is a fully integrated and open online experimental store, specifically designed for software testing (QA) engineers to practice and apply automation testing skills.

Why I Chose It

- ✓ Real world Simulation
- ✓ Rich UI elements
- ✓ Didedicated Qa Sandbox

Tool

Selenium + Java

Framework

TestNG

Pattern

Page Object Model

Test Cases

10

WF1: Search Function

Search about product with valid and invalid input

Workflow Steps

- | | | | |
|---|---|---|--|
| 1 | search with existing name product | 4 | Check the search if the search box is left blank |
| 2 | Search with non existing name product | 5 | Verify the search by typing more than 250 characters |
| 3 | search with keyword to returns all relevant products containing that keyword. | 6 | search when typing numbers and special symbols in the search box |

WF2: Cart

add product to cart,remove product from cart,Edit cart

Workflow Steps
